## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-25 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-22 of U.S. Patent No. 6,530,322. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following.

Claims 1-13 are different from claims 1-14 of the patent only in recitation of "structure" instead of "semiconductor structure" and incorporating the subject matter of claim 2 of the patent in the independent claim. Thus the scope of the claims of the instant application is obvious from the claims of the patent.

Claims 14-21 are different from claims 15-22 of the patent in recitation of "polysilicon structure" instead of "semiconductor structure". It is noted that claim 15 of the patent recites conducting of polysilicon etch of the semiconductor structure. It is

Art Unit: 1746

clear that "the semiconductor structure" is at least partially "polysilicon structure". It is further noted that the original disclosure supports introducing the term "polysilicon structure" only by recitation of "polysilicon etch" through the specification. Thus the scope of claims of the instant application is obvious from the claims of the patent.

Claims 22-25 are different from the claims 23-26 of the patent in recitation of forming of a layer of organic vapor instead of forming a layer of organic liquid.

The scope of the claims of the instant application is obvious from the claims of the patent because in order to form a layer of the liquid by condensation from the vapor it is necessary first to provide a layer of the vapor from which the liquid would be condensed. It is also clear that a layer of the vapor would exist over layer of the liquid.
